

EIGHTH
ANNUAL ANNOUNCEMENT

— OF —

Bennett Medical College

511 & 513 STATE STREET,

CHICAGO, ILLINOIS.

FOR THE SESSION 1875-76.

CHICAGO:

METROPOLITAN PRINTING Co., 90 & 92 FIFTH AVENUE.

1875.

TRUSTEES.

A. L. CLARK, M.D., *President.*

H. N. YOUNG, M.D., *Vice-President.*

GEO. C. CHRISTIAN, L.L.B., *Secretary.*

H. D. GARRISON, M.D., *Treasurer.*

L. S. MAJOR, M.D.

W. A. DUNKLEE, Esq.

H. K. WHITFORD, M.D.

E. B. STEVENS, Esq.

MILTON JAY, M.D.

E. A. TODD, M.D.

J. F. COOK, M.D.

E. F. BLISS, M.D.

HENRY OLIN, M.D.

H. K. STRATFORD, M.D.

FACULTY.

MILTON JAY, M.D., Dean, 513 State Street,

Professor of Surgery.

J. F. COOK, M.D., Treasurer, 199 W. Madison Street,

Professor of Materia Medica.

ANSON L. CLARK, M.D., 511 State Street,

Professor of Obstetrics and Diseases of Women and Children.

H. D. GARRISON, M.D., 511 State Street,

Professor of Chemistry, Pharmacy and Toxicology.

H. K. WHITFORD, M.D., 511 State Street,

Professor of Practice of Medicine.

E. F. BLISS, M.D., 513 State Street,

Professor of Anatomy.

H. A. PHILLIPS, M.D., 52 W. Madison Street,

Professor of Physiology.

G. C. CHRISTIAN, L.L.B., Major Block,

Professor of Medical Jurisprudence.

E. A. TODD, M.D., 127 S. Clark Street,

Professor of Pathology.

S. P. SEDGWICK, M.D., College Building,

Professor of Diseases of the Heart, Throat and Lungs.

HENRY OLIN, M.D., cor. State and Washington Streets,

Professor of Diseases of the Eye and Ear.

E. F. BLISS, M.D.,

Demonstrator of Anatomy.

THE Fourteenth Term of Lectures at BENNETT MEDICAL COLLEGE will begin on Monday, October 4, 1875, and continue twenty-two weeks.

The course will be inaugurated by an introductory address in the lower lecture room by Prof. H. D. Garrison, M.D., Monday evening at eight p. m.

The Board of Trustees and Faculty take pleasure in announcing the completion of the new College building which has been in process of erection since September, 1874, thus enabling them to offer to students of medicine an edifice, first-class in all its architectural and practical appointments, and affording facilities for the prosecution of medical studies second to none.

With the vastly improved advantages thus possessed it is believed that the past liberal patronage extended to this Institution will be merited and received.

The new College is located at Nos. 511 and 513 State street, and is easily accessible from all parts of the city, as five lines of street cars ply on State street at this point, four cars passing on an average every minute.

The lecture hall is well seated and ventilated and is capable of seating 350 students, the anatomical and surgical amphitheater being of equal size. The whole building is warmed by steam. The dissecting room is one of the largest and finest in existence and will accommodate over 125 students at the same time.

The museum and chemical room constitute an important feature, a space of over 1,200 square feet being devoted to these purposes.

The entire property, amounting in value to about \$50,000, is owned in nearly equal proportions by the Faculty, and not, as in too many cases, by one man to whom other members of the Faculty must look for their opinions as well as their positions.

The charter of the College was granted by special act of the Legislature of the State, and confers on the graduates all the rights, privileges and immunities pertaining to the degree of Doctor of Medicine.

The professors are men in the prime of life and are all engaged in the practice of the profession taught by them, thus enabling them to impart practical and reliable information, and to expose the errors of those teachers whose theories have not been tempered and corrected by practical experience.

Students may rely upon acquiring the latest and best practice of the day and age in which we live, instead of a system of treatment in vogue forty or even sixty years ago as imparted by the too conservative teachers of many medical colleges, and which must be unlearned by the young practitioner before he can successfully cope with those whose education has fully kept pace with the rapid advance of modern medical science.

The course of instruction is full and complete in every department, and the system of practice taught is Eclectic in the legitimate sense of the word. Adopting improvements by whomsoever made the Faculty aim to follow wherever truth and science lead and inculcate no other inflexible creed.

Whether remedies or measures are of Allopathic, Homœopathic or Botanic origin are trifling questions as compared with that of their actual worth in practice.

BENNETT FREE DISPENSARY is established at the College, to which the afflicted poor apply in large numbers, by which means students are practically instructed in the most accurate methods of diagnosis as well as in the art of prescribing. In addition to these daily clinical exercises, conducted by Profs. Whitford, Clark, Jay, Sedgwick and Olin on their several departments, the students have full access to COOK COUNTY HOSPITAL, one of the largest institutions of the kind in the country.

In addition to the regular course of lectures as delivered in many medical colleges, the students receive lectures, without extra charge, on special Pathology, Diseases of the Heart, Throat and Lungs; Eye and Ear, and Medical Jurisprudence, by gentlemen of distinguished ability in their several departments.

DISSECTION.

Provision is made by a law of the State for furnishing to Medical Colleges material for dissection (thus removing the ban of criminality existing in some States), hence the supply will be always equal to the demand, and subjects can at all times be obtained on very reasonable terms. Prof. Bliss has personal supervision of the dissecting room.

REQUISITES FOR GRADUATION.

The candidate must be twenty-one years of age and possess a good moral character. He must have been engaged in the study of medicine at least three years and must have attended not less than two courses of lectures, one of which must have been in this College, but four years of reputable practice, with previous study, are considered equal to one course of lectures. He must have dissected, and, previous to graduation, must sustain a satisfactory and honorable examination in every department.

DIRECTIONS FOR STUDENTS.

Students, upon arrival, should at once call upon the Dean, Prof. JAY, at his office, at the College building, where all needed information in regard to board, etc., will be cheerfully given.

Board and lodging can be had at \$3.50 to \$5 per week.

By clubbing together, students often board themselves at an expense ranging from \$1.50 to \$3 per week. A list of boarding houses, with their prices, may be seen at the Demonstrator's office in the College building.

FEES.

Notwithstanding the increased length of the term and the very superior advantages now offered, the fees will remain as heretofore, viz.:

Tuition Fee, including all departments	\$50.00
Matriculation and Demonstrator's Fees, each.....	5.00
Graduation Fee.....	25.00
Hospital Ticket (optional).....	5.00

Scholarships, entitling the purchaser to attend as many terms as he may choose, can be had for \$100.

All fees are payable in advance, but the graduation fee will be returned in case the candidate is unsuccessful or decides to withdraw. Graduates of other regularly organized and chartered medical colleges will be admitted to the full course of lectures on payment of the matriculation fee, \$5.

TEXT BOOKS.

The following works are among the best extant on the subjects to which they relate:

SURGERY. — Erichsen, Gross, Hill, Hamilton.

PRACTICE. — Bennett, Jones, Flint, Roberts, Scudder.

MATERIA MEDICA. — King's Dispensatory, United States Dispensatory, Pareira.

CHEMISTRY. — Attfield, Barker, Fownes, Roscoe.

PHYSIOLOGY. — Bennett, Draper, Dalton, Lehman.

ANATOMY. — Gray, Wilson, Leidy.

OBSTETRICS. — King, Meigs, Ramsbotham.

DISEASES OF WOMEN. — King, Thomas.

PATHOLOGY. — Rindfleisch, Billroth, Green.

MEDICAL JURISPRUDENCE. — Elwell, Taylor, Beck.

OPHTHALMOLOGY. — Williams, Stelwag, Wells.

DISEASES OF THE HEART AND LUNGS. — Flint, Walsh.

DISEASES OF THE MIND AND NERVOUS SYSTEM. — Hammond.

SPRING OR SUMMER SESSION.

Soon after the close of the regular term, a Spring or Summer term, suitable for the instruction of beginners, will commence and continue three months. The lectures during this term will not be so frequent, but will be given by the regular Faculty upon their several departments.

The entire fees for this term will be \$10.

The Spring term will not be accepted as a regular term for the purpose of graduation, but the knowledge gained by its attendance will have due weight when the candidate presents himself at the end of a regular term.

This curriculum of sessions is adopted after mature thought and deliberation in the full belief that it is the best for the student as well as the reputation of the College, and that it will commend itself to the good judgment of every experienced practitioner.

Those who are merely seeking diplomas, without regard to adequate qualifications as practitioners, and who will be contented with a very cheap and superficial medical education cannot be expected to favor this course; but those wishing to lay a broad and deep foundation for a successful and reputable practice will find the time none too long.

It should be the object and aim of Medical Colleges to impart the largest possible amount of instruction, and not degenerate into laboratories for the manufacture and sale of diplomas on easy terms by means of short sessions.

In conclusion, the Faculty desire to say that with their increased facilities they feel that they can safely promise a far better, more instructive and interesting course of lectures than any which have preceded, and that in the future as in the past every effort will be made to entertain and instruct the student.

GRADUATES

OF

BENNETT MEDICAL COLLEGE.

SESSION — 1868-9.

Higgins, Thos. M.....	Illinois.	Stevens, B. F.....	Illinois.
Higgins, C. A.....	"	Stevens, E. W.....	Wisconsin.
Kelly, L. A.....	"		
Leutselschab, C.....	"

Harvey, W. R.....	Illinois.	Watson, J. S.....	Illinois.
Jillson, H. K.....	"		
Kilmer, A. S.....	New York.		
Landis, N. L.....	Illinois.		

AD EUNDEM DEGREE.

Robertson, Geo. E., M.D., Wisconsin.

ESTABLISHED 1868.

THE
Chicago Medical Times,

A Monthly Journal of 48 Pages of Reading Matter.

EDITED AND PUBLISHED BY

Profs. A. L. CLARK, M.D., and H. D. GARRISON, M.D.

The editors aim to present to their readers every important improvement and discovery in medicine, surgery, obstetrics, and the allied medical sciences, and to thus keep them thoroughly posted to the very present.

With the view of extending the influence of this journal, the publishers have arranged to offer the following extraordinary

PREMIUMS.

For FIFTY new subscribers at \$2.00 each, one scholarship in Bennett Medical College, worth in cash \$100.

For TWENTY-FIVE new subscribers at \$2.00 each, the Tuition Fees for one session, \$50.

For ONE new subscriber at \$2.00, one copy of Bennett's Report on Mercury. Price, \$1.00.

In every case the money must accompany the names.

Regular Subscription Price, \$2.00 per Year, in Advance.
